

**NEUROSCIENCE TODAY**

A DIVISION OF FORENSIC NEUROSCIENCE TRAINING ACADEMY

Contact Dr. Jarrod Brown - [jerrod01234brown@live.com](mailto:jerrod01234brown@live.com)

Neuroscience Today collaborates with different media outlets to spread information about neuroscience including:

- Blogs
- Electronic media
- Podcasts
- Print
- Professional outlets

Neuroscience Today is dedicated to these principal goals:

- Increasing awareness of neuroscience findings among both professionals and caregivers
- Highlighting how neuroscience findings can be turned into actionable steps and techniques
- Guiding professionals on how to apply neuroscience findings in different settings
- Teaching caregivers how neuroscience findings can help improve outcomes

Neuroscience is the scientific field focused on the:

- Brain
- Spinal cord
- Nervous system

Neuroscientific findings can help better understand the causes of different conditions and behavioral problems.

Neuroscience research findings, approaches, and techniques have significant implications for a diverse array of fields, such as:

- Behavioral genetics
- Business
- Chemistry
- Criminal justice
- Education
- Human development
- Law
- Medicine
- Nutrition
- Psychology
